The **four episodes** of the "**5TO SUCCEED**" interactive, educational Web Series produced by CONFORM S.c.a.r.l., were provided to the project beneficiaries, in addition to the materials and tools created by the partners with the funded initiative, to promote a better understanding of economic and funding mechanisms and bridging the gap in entrepreneurial literacy.

5TO SUCCEED - The "Movie Education" methodological model

The "5TO SUCCEED" interactive, educational Web Series, adopting a language shaped on the communicative characteristics of the Network and applying the "**Movie Education**" (© CONFORM S.c.a.r.l.) methodological model allows one:

- to overcome the classic models of training based on classroom teaching and/or e-learning, allowing the viewer to interact independently with the product, with a greater degree of emotional involvement;
- to combine entertainment and learning, through an interactive, film approach, which:

- uses an engaging and captivating narrative, able to favour a more effective and conscious assimilation of knowledge and the adoption of emulative behaviours, triggering awareness-raising learning processes;
- exploits the potential of new digital technologies, to enthral viewers and direct them, in a motivated and conscious manner, to second-level technical insights that can be used with interactive tools.

5TO SUCCEED –THE “SMART AND JUST IN TIME LEARNING” APPROACH

The "5TO SUCCEED" interactive, educational Web Series aims to allow users to acquire, in an integrated way, knowledge, skills and behaviour of entrepreneurial action guaranteeing the following three dimensions of learning:

- **cognitive (“knowledge”)**, thanks to the possibility offered to the viewer-learner to access, during the viewing of the episodes, by clicking on sensitive areas and/or touch points in overlay, further investigation content (such as e.g.: learning objects, thematic websites, interviews with privileged testimonials, power point presentations, pdf. documents, video-tutorials, etc.), recalled by the "**keywords**" contained in the staged dialogues

- **operational** (“**know how**”), through the “**interpretation**” of the different phases of the business idea development process, to effectively manage relationships and economic-financial dynamics and address the crucial aspects of business modelling and management, allowing access to operational tools such as spreadsheets, software, operational guidelines, templates, etc.

- **behavioural** (“**know how to be - attitude**”), with the possibility of observing, while viewing the Web Series episodes, the relational, negotiation, decision-making, problem-solving entrepreneurial behaviours, of the team working shown by the actors, as critical success factors of entrepreneurial action, allowing the viewer to identify the errors to avoid and the virtues to emulate.

The methodological approach adopted:

a) makes the viewer/learner the main protagonist and author of his/her learning process, with the possibility of autonomously deciding when, where and how to use the training contents (smart and just in time learning).

b) has taken the **Entrepreneurship Competence Framework (EntreComp)**, developed by the Joint Research Center of the European Commission, as a reference guide to confer and, at the same time, guarantee the value and rigour of the web-series pre-production operational processes, with particular reference to the development of the plot and the script of the individual episodes, taking into account the following 15 distinctive competencies of entrepreneurial action:

1. **Spotting opportunities** - identify opportunities for creating value
2. **Creativity** - develop creative and purposeful ideas
3. **Vision** - work towards your vision of the future
4. **Evaluating ideas** - make the most of ideas and opportunities
5. **Ethical and sustainable thinking** - assess the consequences and impact of ideas, opportunities and actions
6. **Self-awareness and self-efficacy** - believe in yourself and keep developing
7. **Motivation and perseverance** - stay focused and not give up
8. **Mobilising resources** - gather and manage the resources you need
9. **Mobilising others** - inspire, enthuse and get others on board
10. **Taking initiative** - ability to try
11. **Planning and management** - prioritize, organise and manage
12. **Coping with uncertainty, ambiguity and risk** - make decisions dealing with uncertainty, ambiguity and risk
13. **Working with others** - team up, collaborate and network
14. **Learning by experience** - learn by doing
15. **Economic e financial capability** - apply economic and financial know how.

Some "**Key Words**" have been inserted in the Web-Series script to activate the interactions through which the viewer can freely access, based on his/her level of knowledge and interest, a plurality of resources and in-depth educational materials referring to the **15 aforementioned entrecomp skills**, to be able to acquire and consolidate all the constituent elements of entrepreneurial skills.

A combination of coincidences will lead Luca to suggest turning his doctoral thesis on intelligent bacteria into a business idea to his friends. Not without some difficulties, the five friends will try to fulfil their entrepreneurial dream.

Everything seems to be going well ... but how will it turn out?

5TO SUCCEED - The Episodes

The "5TO SUCCEED" interactive, educational Web Series consists of **4 thematic episodes**, of a total duration of about **45 minutes**, which narrate the process of enterprise creation and management by a team of five young friends, with attention to the main financial needs that the newly-founded Bio-Water, a small bio-tech company specialized in water decontamination, will meet from the phase of start-up to the subsequent initial consolidation phase.

First Episode - Title: Bacterium

THEME: The Business Idea

Luca reads an advertisement regarding a prize of € 50,000 to the best entrepreneurial idea, also guaranteeing a coaching course on business start-up.

His doctoral thesis on intelligent bacteria capable of decontaminating aquatic flora and fauna becomes the basis to realise his dream of becoming an entrepreneur.

The group of friends (Luca, Filippo, Maggie, Silvia e Iole) sets to work and completes the application form answering questions related to financial concessions, responding to questions concerning **innovation of the idea, environment analysis, market analysis, competitor analysis, SWOT and PESTEL analysis, business taxation and economic-financial planning**.

The first episode ends with the presentation of the project.

Second Episode - Title: 2 Red Cards

THEME: The strategic and executive business design

After a long wait and fearing not being successful, the 5 friends receive the news that the application has been admitted and that they have been awarded the prize.

So, they begin the coaching phase, which will lead them to define the strategic and executive business planning process phases, with the drafting of the **Business Model Canvas** and the **Business Plan**.

Third Episode - Title: Bio-Water ... Be happy!

THEME: The mortgage

The 5 friends manage to set up the "**Bio-Water**" Start-up and to register their patent on intelligent bacteria. After founding the company, the first difficulties arise on how to provide Bio-Water with a suitable site and operating plant. Among the various financing solutions proposed (Crowdfunding, Business Angels, Strategic Alliances), the 5 new entrepreneurs will opt for a **mortgage** from a bank.

Fourth Episode - Title: A river in full flow

THEME: Leasing

After a few months, thanks to the mortgage and the tenacity of its partner-friends, Bio-Water has now started: an important company is interested in working together on a pilot project to decontaminate The Ripa River.
